

CONSTRUCTION NOTICE

WEST VALLEY COLLEGE CAMPUS

PROJECT NAME: WVC Alternative Energy Solar PV Project
ACTIVITY DESCRIPTION: Lot 7 Solar PV Construction
SCHEDULE: **May 4, 2020 – August 31, 2020**
CAMPUS IMPACT: SEE ATTACHED PLAN FOR SOLAR PV PROJECT PARKING LOT 7

West Valley College's Parking Lot 7 will be closed from May 4, 2020, through August 31, 2020 to construct parking structures with solar PV panels and parking lot lighting. This project is the beginning of an on-going project for Alternative Energy production with solar PV panels that will eventually include parking lots 1 and 2. When completed, the project is expected to provide an additional 17% (1.19kWH year 1) of the West Valley Campus current annual energy consumption.

Note that all pedestrian access and parking will be blocked from Lot 7. Signs will be placed informing staff and students of the other parking lot locations. Fencing will be established to prevent access to the work area. Fencing will be removed and parking lot will be reopened to the public estimated by 8/31/20.

Construction work for Solar PV Project in Lot 7 will be ongoing from May 4, 2020 through August 31, 2020. The hours of construction will be from 7:30am to 6:00pm. Work will consist of demolition of some existing asphalt, grading and compaction of soil, placement of aggregate base and pouring of concrete. Some noise and vibration impact are expected. Additionally, electrical work to commence on establishing new power to new solar panels and lighting fixtures.
