

Reporting Class Materials Information in the eCampus FAST Platform

1

eCampus is the college's bookstore vendor for all class materials. Faculty must report information into their online adoption platform known as FAST for all CRN's they are assigned to teach. To meet federal and state requirements, textbook information must be submitted to the bookstore by the day registration begins for the term in which the materials will be used. If an instructor is assigned a section after registration has begun, the information should be submitted as soon as possible thereafter. Please note that you may NOT link to external vendors or publishers' websites in the comments section. *If a course requires at-cost materials and also uses OER/free materials, do not check OER in eCampus, as it could confuse students. If the paid material is truly optional, then the section can be OER, and the optional material can be addressed solely in the syllabus.*

Watch the eCampus provided training here: [Watch the eCampus training here](#) (Passcode: X6cu7=K1)

Faculty can access the FAST platform in the WVMCCD Portal by selecting the following when they log in:

Classes which use traditional textbooks

Step 1: Find the textbook using either the “Add Adoption” button and entering the ISBN directly, or use the search the catalog button to see if you can find the book in the eCampus catalog.

Step 2: In the Importance drop-down, select the best option.

Step 3: Consider if students might benefit from any explanation from you in the book or course comments boxes. The text in this box can be formatted, and we recommend size large and the color red, to make the note more visible to students. Comments in these boxes must relate directly to the class materials required of students in your class. **Do** not put in non-materials related comments.

ing similar.

Option 1: If the OER textbook is in the eCampus catalog.

Step 1: Find the textbook using either the “Add Adoption” button and entering the ISBN directly, or use the search the catalog button to see if you can find the book in the eCampus catalog. If found, bring the book into your adoption.

Step 2: Mark the option “Open Educational Resources OER and/or library content required for this course.”

Step 3: In the Importance drop-down, select Optional.

Step 4: In the Book Comments box, provide a brief explanation and link to the free online version of the book for your students. The text in this box can be formatted. We recommend size large and the color red to make the note more visible to students.

Open Educational Resources and/or library content required for this course.

- **Do not link to external vendors in eCampus. It is a breach of the contract with eCampus.** Options for acquiring materials from external vendors can be indicated in the learning management system, Canvas, or the class syllabus.
- If a course requires at-cost materials and uses OER/free materials, do not check OER in eCampus, as that can confuse students. If the paid material is truly optional, then the section can be OER, and the optional material can be addressed solely in the syllabus. Do not submit adoption information for optional materials in eCampus.
