

AIRCRAFT CRASH

AIRCRAFT CRASH

- Take cover under tables, desks and other objects that will give protection against flying glass and falling debris.
 - In case of fire, activate the building's fire alarm system and call 9-1-1. (see FIRE)
 - In case of building evacuation (see "BUILDING EVACUATION"), help people get out safely.
 - If outdoors, move to a safe distance from debris and stay upwind to avoid inhaling smoke and chemicals. Avoid power and utility lines.
 - Go to a clear space at least 500 feet from the affected building or area. Keep streets and walkways clear for emergency vehicles.
 - Stay calm. Give first aid as necessary.
 - Do not return to the evacuated building until directed by Emergency Response Team members.
-
